

CALGANG® PROGRAM
Component: 50.30.662, 40.30.662

PROGRAM OVERVIEW

The CALGANG® (CG) Database Project is an automated gang intelligence database system providing intelligence information to assist local, state, and federal law enforcement agencies to use as an investigative tool in the investigation of gang related crimes. Additionally, the system provides tactical, and strategic information to support gang units and police administrators throughout California. The CALGANG® system allows local law enforcement agencies to maintain their own local database of information on local gangs and gang members, and to share the information to law enforcement agencies throughout the state through regional nodes connected to a central index administered by the California Department of Justice utilizing grant funds allocated through this program.

Cal EMA has recently been informed that the estimated amount generated in Local Safety & Protection Account (LSPA) funds for FY 2009/2010 is significantly less than the \$55 million anticipated. The Department of Finance recently estimated LSPA funds for FY 2009/2010 in the range of \$35 - \$39 million; or slightly more than two-thirds of what was originally estimated. Unfortunately, this program was put into grant award agreement utilizing the \$55 million LSPA amount. At this time, Cal EMA does not have any information concerning the availability of funds for the above referenced programs for FY 2010/2011.
